Attending a quality early childhood education program can benefit your child's health as well. Approximately 60 to 70 percent of preschool-age children attend an early childhood program or child care program out of the home, according to the Australian Paediatric Society. Studies show that being provided with quality care in those programs can positively influence your child's learning and development. In addition, your child's socio-emotional development is less likely to be adversely affected, with a decreased chance of needing behavioral or mental health care once she enters primary school.
