Faculty of Agriculture
Department of Nutrition and Food Technology
Fall Semester 2007

Course Information	
Course Title	Advanced Diet Therapy
Course Number	NF 769
Prerequisites	Graduate student
Course Website	Not Available
Instructor	Hiba Bawadi, Ph.D.
Office Location	C4L3
Office Phone	22263
Office Hours	S and T 9:15-10:15
E-mail	hbawadi@just.edu.jo
Teaching Assistant	None
Course Description	
This course will focus on the Principles and methods for use of diet as therapy in certain pathological conditions	

. Text Book	
Title	Krause's Food, Nutrition, & Diet Therapy
Author(s)	Mahan LK & Escott-Stump S
Publisher	Saunders
Year	2004
Edition	11 th Edition

Assessment Policy		
Assessment Type	Expected Due Date	Weight
First Exam	TBA	25%
Second Exam	TBA	25%
Final Exam	TBA	40%
Assignments	Home works given through out the semesters	10

Course Objectives	Weights
1. Understand the application of nutrition principles to current practice of clinical nutrition. This includes major concepts, medical terminology, sources of information, and factors influencing dietary modification.	30%
2. Apply the factors affecting diet modification to planning and calculation of quantitative and qualitative modified diets.	20%

Diet therapy is a therapeutic method consisting in the treatment of various diseases with a special diet; the same as medical nutrition. Diet therapy is the use of nutrition for the treatment of various diseases. The influence of clinical nutrition is determined by the qualitative and quantitative composition of food (proteins, fats, carbohydrates, vitamins, minerals, microelements, etc.), its calorific value, physical properties (volume, temperature, texture), diet (eating hours, food distribution during days, the frequency of receptions), the therapeutic effect of individual products. Medical nutrition is prescribed in the form of special diets (therapeutic diets / tables), taking into account the pathogenesis of the disease, the characteristics of the course of the main and associated diseases in a Krause's Food & Nutrition Therapy. 1370 Pages · 2007 · 187.9 MB · 8,828 Downloads · English. clinical nutrition. of Foods, Nutrition and Diet Therapy, 5th Edition Fundamentals of Foods, Nutrition a Encyclopedia of Foods. Dietary interventions have included diets that restrict "allergenic"™ foods starting with a generally restricted diet and adding foods that do not worsen the child's behavior, a diet that restricts food additives and preservatives referred to as the Feingold diet, and diets that restrict sugar. From: Encyclopedia of Human Nutrition (Third Edition), 2013. Diet is a very important aspect of the therapy for many disease states, complementing and even replacing drug therapy in some cases.

Food & the Nutrition Care Process. KRAUSE. About the book. A trusted classic for over 50 years, Krause's Food and the Nutrition Care Process, 14th Edition presents the most cutting-edge and up-to-date dietetics content available in this ever-changing field. Nicknamed the "nutrition bible", students and practitioners alike turn to its current, comprehensive content, engaging pedagogy and design, and logical presentation of information. This new edition includes the 2015 Dietary Guidelines for Americans, more visuals, and highlighted Clinical Case Studies, Clinical Insights, and CI Diet and Nutrition in Crohn's Disease and Ulcerative Colitis. 20 Questions & 20 Answers. eCredovimtisiopenIde2te0l0y8. Crohn's disease and ulcerative colitis represent a special challenge for both the patient concerned with the choice of foods and for the practitioners of nutrition therapy seeking how to best advise them. Typical symptoms, such as digestive complaints, stool irregularities, diar-rhea, abdominal pain, nausea and weight loss, have often been blamed on dietary factors, since they often occur after eating. As a result, both patients and their families are uncertain what they should eat and drink in order to both avoid an increase in symptoms and pre-vent nutritional deficiencies. A poor nutritiona...
