The Cuban Revolution's major role in the international political arena is without a doubt uncontested. We'll take a look at a small guerrilla operation that led to the Cuban Revolution and Fidel Castro, as well as Che Guevara's impact on Cuba and further afield, and efforts to export ideals held by Cuba's regime to the world. Whether or not you are for or against the revolution, you cannot doubt the impact it has had in the global sphere. The story of the Cuban Revolution and is an inspirational one of a true underdog, but there are multiple facets to it. It shares similarities with Iran's Islamic Revolution, with the most significant being that an unexpected regime rises to power following a popular uprising. Pre-Cuban Revolution. Cuba: America's "island". Source: [wikimedia.org](https://en.wikipedia.org/wiki/Cuba). I should start with words of gratitude to Queens University and all those who participated in the organization of this Conference on the Cuban revolution. Their initiative, hospitality and excellent preparations have facilitated three days of useful discussions in an open and constructive atmosphere. It was not an easy endeavour. Any attempt to look at the Cuban Revolution and to analyze it with objectivity poses challenges that defy intellectual integrity and, many times, personal honesty and candor. In a brilliant work for which we will never be thankful enough, Louis A. Pérez Jr. wrote: "Cuba The Cuban Revolution (Spanish: Revolución cubana) was an armed revolt conducted by Fidel Castro's revolutionary 26th of July Movement and its allies against the military dictatorship of Cuban President Fulgencio Batista. The revolution began in July 1953, and continued sporadically until the rebels finally ousted Batista on 31 December 1958, replacing his government. 26 July 1953 is celebrated in Cuba as the Day of the Revolution (Día de la Revolución). The 26th of July Movement later reformed along

Cuban Revolution, armed uprising in Cuba that overthrew the government of Fulgencio Batista on January 1, 1959. The revolution had as its genesis a failed assault on the Santiago de Cuba army barracks on July 26, 1953. That attack's leader, Fidel Castro, went on to rule Cuba from 1959 to 2008. Estrada Palma's administration attempted to implement progressive measures, but it was plagued by instability. His party, the Conservatives (later known as the Moderates), emerged victorious in the elections of December 1905, but the opposition Liberals accused the government of rigging the vote. This charge, along with widespread pension fraud and the failure to bring about proposed governmental reforms, triggered a revolution in July 1906. The Cuban Revolution's major role in the international political arena is without a doubt uncontested. Cuba: America's "island". Source: wikimedia.org. The Cuban revolution inspired revolutionaries throughout Latin America as idealistic young men and women took up arms to try and change hated governments for new ones. The results were mixed. In Nicaragua, rebel Sandinistas eventually did overthrow the government and come to power. Cuba and the United States, meanwhile, maintained an antagonistic relationship well into the first decade of the 21st century. Waves of migrants fled the island nation over the years, transforming the ethnic makeup of Miami and South Florida. In 1980 alone, more than 125,000 Cubans fled in makeshift boats in what came to be known as the Mariel Boatlift.
