California , Paul Backhurst, May 1, 2001, Sports & Recreation, 510 pages. A compendium of the best California adventures with 62 trips by 17 Wilderness Press authors. Trips range from one night to two weeks in the Coast Ranges, Sierra Nevada

Although primarily a comprehensive trail guide to Lassen Park, this book also contains a road log keyed to the roadside markers that signal interesting features within the park, information on the natural history of the area, as well as information on campgrounds, resorts and more. Covers Lassen Park, Caribou and Thousand Lakes wildernesses, Hat Creek Valley and McArthur-Burney Falls State Park. Includes a topographic map that shows the Park and vicinity on one side, and the adjacent wilderness areas on the other.

This comprehensive guide to the trails and roads of the Mt. Lassen area is tailored to a variety of outdoor recreationists--hikers and horse packers, skiers and snowshoers, botanists and bird watchers, sightseers and rock hounds, anglers and hunters. Included is a foldout topographic map. --This text refers to an out of print or unavailable edition of this title.

While the book covers its main focus - hiking trails - more than adequately, it also includes more than one hundred pages about the natural history of the area, road logs for driving in the National Park, descriptions of nature trails, and a decent, removable map of the area. Although the main text is somewhat dated (1981), a helpful six-page update from 1999 is included. All this information does make the book a little bulky for hiking or backpacking, so photocopy the pages you'll need before you hit the trail. (And remember that big guidebooks with lots of information are better than those that don't have enough!)

I can't believe others are reviewing this book so highly. It is an OK natural-history guide, with a decent general overview of the area. But don't try to get anywhere with this book or look for specific information. For example, although it has individual chapters for each region (e.g. Caribou wilderness, Thousand Lakes, etc.), they don't contain any information on geology, fishing, zoology, etc. Instead, these topics are lumped into their own general chapters in the front of the book. With the notable exception of the wildflowers section, these chapters seem somewhat topical and weak. In the case of fishing, the "chapter" is one page. Likewise with resorts and campgrounds, which are lumped into a three-page list in a separate chapter, rather than discussed by region.

Although it contains one nice topo for the entire Lassen area, the 1:62500 scale and lack of detailed maps for any of the sections makes finding trailheads or following trails nearly impossible. I guess it's just not clear what this book is trying to be -- if it is a natural-history guide, as the back cover proclaims, why so much space describing trails(half the book or more)? If it is a trail guide, why no decent maps to make it usable?

I was very disappointed in the overall format and descriptive narrative of this book. If you are a rock hound or a naturalist that is concerned with all of the Latin names of every plant species in the Lassen area, this review may not apply. However, if you plan on using this book to help plan a

multi-day backpacking/hiking trip through Lassen you should look elsewhere.

No doubt the author is very knowledgeable about the area, but the format is not for trip planning, but more for reference to read as you are walking the trails. The trails are not linked in loops, or connected for round-trip hikes in any discernable way which is a necessity for trip planning in my opinion. Overall, this book is great if you want to catalogue volcanic rock and plants, but if you are planning a backcountry trek look for another hiking guide.

Whether you're interested in the panoramic view from atop Lassen Peak, or the geological history that produced the craggy peaks, hot springs and mud pots, and scattered lakes of the park, this book will help you plan and enjoy a trip to Lassen Volcanic National Park, Caribou Wilderness, Thousand Lakes Wilderness, Hat Creek Valley, or McArthur-Burney Falls Memorial State Park. With descriptions of over 60 hikes, you can enjoy hiking through fields of wildflowers, exploring volcanic wonders, relaxing by sparkling lakes, and the peaceful solitude of being surrounded by Lassen Park's majestic mountain peaks.
