Description:

Known as "DSM-IV", the latest version of this mental health manual features a new coding system compatible with the ICD-10. Based on the results of field trials, a number of criteria sets are simplified for use in clinical settings: somatisation disorder; schizophrenia; generalised anxiety disorder; and antisocial personality disorder. The "DSM-IV" text is expanded to maximise clinical utility and educational value. Additional subsections of text are: "Associated Laboratory Findings" to note lab tests that may be relevant to a particular diagnosis; an "Age-Related Features" section, added to most disorders to note how the disorder presents differently throughout the life cycle; a

"Gender-Related Features" section including presentations that vary by gender; a "Culture-Related Features" section for each disorder, to discuss how the disorder presents differently in different cultural settings; and the "DSM-IV Substance Use" section discussing each substance in great detail, describing patterns of use and substance-induced conditions.

As a companion to the Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5[trademark]), the DSM-5 The Diagnostic and Statistical Manual of Mental Disorders (DSM; latest edition: DSM-5, publ. 2013) is a publication by the American Psychiatric Association (APA) for the classification of mental disorders using a common language and standard criteria. It is used by clinicians, researchers, psychiatric drug regulation agencies, health insurance companies, pharmaceutical companies, the legal system, and policymakers. Purpose DSM-IV provides a standardized classification system for the diagnosis of mental health disorders for both children and adults. Description DSM-IV disorder and condition terms are organized into 18 classes, and most terms are linked to International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) codes. For more information about ICD-9-CM, see the ICD-9-CM source synopsis.Â Sites Consulted. American Psychiatric Association.
