Intimate Partner Violence: A Resource for Professionals Working with Children and Families is an exemplary and affordable resource with contents written by and for members of the child and family protection community. Written by more than 20 of the foremost authorities on the subject, ***Intimate Partner Violence*** includes in-depth analyses of every aspect of IPV, including contemporary concepts and research on its prevalence, nature, causes, and impact. Complementing the volume’s 15 chapters, 3 forewords written by esteemed members of the violence prevention community—Betsy McAlister Groves, Annie Lewis-O’Connor, and Carole Jenny—effectively introduce and contextualize the book’s content while illuminating the ubiquitous nature of intimate partner violence.

For social workers, counselors, child advocates, and other professionals working within the context of child and family protection, this resource will provide the knowledge essential to effectively understand, deal with, and prevent intimate partner violence—a pervasive problem in our society that affects adults and children and crosses all socioeconomic, racial, and ethnic boundaries. Including chapters with dedicated foci on relevant topics such as processes for screening and identifying IPV in health care settings, dating violence, children who witness violence, the SANE response, mental health aspects, and many others, this resource is an easily accessible, general guide to the multiple aspects of intimate partner violence.

The intent of ***Intimate Partner Violence*** is not to offer a comprehensive clinical and forensic reference text meant exclusively for medical and technical professionals, but rather to provide a thorough overview to assist managers, supervisors, directors, and other front-line professionals who have the responsibility of setting and implementing policies in making informed and effective decisions. Its encyclopedic array of information is written in a comprehensible manner and can be quickly and easily referenced by lay professionals who deal with the consequences of IPV on a daily basis.
