Goodreads helps you keep track of books you want to read. Start by marking "Product Graphs: Structure and Recognition" as Want to Read: Want to Read saving... Want to Read. In mathematics, a graph product is a binary operation on graphs. Specifically, it is an operation that takes two graphs G_1 and G_2 and produces a graph H with the following properties: The vertex set of H is the Cartesian product $V(G_1) \times V(G_2)$, where $V(G_1)$ and $V(G_2)$ are the vertex sets of G_1 and G_2 , respectively. Two vertices (a_1, a_2) and (b_1, b_2) of H are connected by an edge, iff a condition about a_1, b_1 in G_1 and a_2, b_2 in G_2 is fulfilled. Product graphs : structure and recognition. W. Imrich, S.
