IMF published its staff report and selected issues report in context of the 2019 Article IV consultation with Indonesia. IMF Directors welcomed the appropriate focus of the near-term policy mix on protecting macro-economic and financial stability, safeguarding buffers, and addressing vulnerabilities. The staff report highlights that, overall, the banking system remains sound. Corporate foreign-exchange regulations helped corporates increase the share of hedged foreign-exchange loans; however, elevated foreign-currency debt of corporates leave them exposed to rupiah volatility. This could have spillovers to the banking sector, as most bank loans (52%) are extended to the corporate sector. 19 See IMF Portugal, Staff Report for the 2012 Article IV Consultation, for a retrospective analysis of the causes of the crisis. 22 international monetary fund.
