Although I believe Scott made many mistakes in planning and executing this trip, the two most egregious to me are: paying money for sledges versus dogs, when there wasn't that much information on sledges, especially used in extreme temperatures; and allowing his friend, Bill, to take a scientific excursion into extremely dangerous territory to get samples of embryos.Â Extremely entertaining and well told, the story is both inspirational and tragic. For many of the men on board this was their first smell of grass and trees in over twenty-six months, but with secrecy at a premium only two of her officers were landed before the ship weighed anchor and slipped back out to sea to disappear into the pre-dawn gloom from which she had emerged.

Emperors of the Ice: A True Story of Disaster and Survival in the Antarctic, 1910-13. Written by Richard Farr. Narrated by Michael Page. That September, Captain Robert F. Scott announced a new scientific expedition that would put Antarctica firmly on the map at last and claim the South Pole for Great Britain. Twenty-three-year-old Apsley Cherry-Garrard was asked to join. With no special skills, and terrible eyesight, he seemed a surprising choice. Yet in the most lethal wilderness on earth, where temperatures plummet to -77°F and even bacteria can't survive, "Cherry" proved himself so capable that he became a key member of the expedition. 2 New from S\$13.28.
